GENERAL INDEX  
1852 - 2004

General Index to Transactions, 1852 - 2004

Please note that this cumulative index reflects the differing styles of the many general indexes published during the years covered. The same topic may be indexed with slightly different spellings or in different ways as indexing fashions changed.

The Woolhope Club is grateful to the Heritage Lottery Fund which provided the funding for the transcription of the original indexes.

# *Transactions* of the Woolhope Naturalists' Field Club

The *Transactions* of the Woolhope Naturalists' Field Club have been published for each year since 1852, though those for the years 1852 to 1865 are contained in a single volume published in 1907. This was compiled by H. Cecil Moore, mainly from the few pamphlets which had been published, from accounts of meetings published in the *Hereford Times* and from notes taken at the time. The *Transactions* contain a record of the Club's activities and its membership as well as papers on subjects of interest to the Club's members. They are an unparalleled resource for the study of Herefordshire.

The early volumes are particularly strong on natural history and mycology, but latterly there has been a more even balance between the different disciplines which interest the Club; natural history, geology, history and archaeology. The illustrations form a valuable archive of many features which have now disappeared, particularly the series on veteran trees.

All Herefordshire libraries and many other research libraries hold a set of the *Transactions*. They were usually issued as yearly parts in soft covers, but the older volumes are often found in dark green and gold hard-cover bindings. The standard issue is now published in pale green soft covers.

## General Index to the *Transactions* - 1852-2004

The index that follows is an alphabetical list of subjects, which has been compiled from various published indexes of the *Transactions*. Two extra volumes have been indexed: these are the Centennial volume and the Sesqui-centennial volume.

The General Index should be used first to find subjects of interest. Having found the entries, note the year(s) and page numbers. The Contents Index (in the other volume of this index) may then be used to amplify the information found in the General Index.

Please note that the information has been compiled from the original indexes, and is thus variable in style and quality. In addition to mistakes in the original material, it is inevitable that a small number of errors have been introduced, both by the original indexers and during the recent transcription process.

When searching, consider alternative spellings, as you will note that it has not been possible to make these consistent in such a large number of entries.
